

Adams and Reese Data Breach Hotline

Data breaches are on a rise and we are here to help you 24 hours a day, 7 days a week.

We know that responding to a data breach requires a unique approach and a strong commitment to client service, including availability beyond that traditionally offered by attorneys. We understand these requirements, having acted as breach coach for many types of cyber incidents, managed cyber liability claims and worked with clients and third-party support vendors to overcome the serious challenges presented by these breaches.

With that in mind, we offer a 24/7/365 data incident hotline and email address. Both are directed to on-call attorneys, and not a simple answering service.

We understand that, in addition to representing our clients, we are acting in the marketplace as the face of their response. These incidents often involve potentially catastrophic effects, fear, panic, crisis-driven communication, legal, regulatory and public scrutiny. We take these obligations seriously and pride ourselves on our ability to bring order out of chaos in managing these incidents, no matter the hour of day. Our team is on call should your organization experience a data breach.

Phone: 833.430.0509
Email: breach@arlaw.com
